who could be interested in this?

anybody who ...

- ... wants to know why and how computer science
- immediately connects and translates to the physical world.**
- ... would like to see **immediate real-world involvement** in their work.
- ... would like to understand what
- really happens if you run a high level program.**

"Text book" for the course

[Patterson17]
David A. Patterson & John L. Hennessy
Computer Organization and Design – The Hardware/Software Interface
AKM edition, Morgan Kaufmann 2017

☞ Many concepts in this course are in there – **but not all!**
The [Patterson17] provides an excellent general background and a lot of in-depth studies into more specific fields.

☞ References for specific aspects of the course are provided during the course and are found on our web-site.
